

# Dani Joest

Bogor, Indonesia  
www.inovixa.web.id/ceo

A Chief Executive Officer as well as a Full-Stack Developer & Software Engineer with a proven track record of building and leading the development of innovative digital solutions. Experienced in designing system architectures, managing cross-functional teams, and developing large-scale web technologies, applications, chatbots, and API integrations. Skilled in payment systems, digital top-up services, and infrastructure security, with a strong focus on efficiency, scalability, and business sustainability. Committed to delivering technology solutions that provide strategic value for companies and business partners.

## Experience

---

### Chief Executive Officer (CEO) & Founder

PT Inovixa Technologies Solution · Full-time

Mar 2025 - Present | Bogor, West Java, Indonesia · Remote

Led the company's strategic direction and oversaw the development of digital products (websites, applications, chatbots, APIs).

Developed and managed multiple brands and digital services, including top-up platforms, AI chatbots, and payment systems.

Implemented security standards, CI/CD pipelines, and cloud-based solutions to ensure system efficiency and reliability.

Established strategic partnerships with stakeholders to expand business reach and foster innovation.

Coordinated cross-department teams to ensure effective and measurable company operations.

### Full-Stack Developer & Software Engineer

Freelance Programmer · Contract

Jan 2022 - Nov 2024 | Bogor, West Java, Indonesia · Remote

Developed web applications, backend systems, and automation solutions for various clients.

Specialized in API integration, scalable architecture, and system optimization.

Managed end-to-end software development lifecycle using agile methodologies.

Collaborated directly with clients to identify requirements and design tailored solutions.

Applied basic DevOps practices to improve application reliability, testing, and maintenance.
